ABOUT US

We are the IT team behind the mobility software of the car sharing company Oply which was proven on the market for several years with 5-star-ratings (after EUR25m total investment). The former CTO of Oply acquired the software rights and founded Jocoda Mobility Technology to optimize the software to a white labeling mobility solution.

Jocoda Mobility Software

Don't license your mobility software - own it!

WHAT

Jocoda offers a customizable while-label mobility software solution to digitize / manage all challenges and processes in fleet management

The software platform supports corporate fleet management, car rental, vehicle sharing and digital subscription based B2B & B2C business models

HOW

Via a fully connected onboard unit our mobility software permits you to gain remote control and keyless access to all the vehicles of your fleet

The proven all-in-one mobility software solution offers user friendly and customizable interfaces for your staff in front desk, back office, call-center and the technical services

The mobile app designed for end-user permits the drivers to plan trips ahead or book the ride right away, locate the vehicle, unlock doors and start the motor with their phone

WHY

In a highly competitive and complex field such as mobility you need a reliable, affordable and scalable platform that permits you to digitize processes, to support your operations and let you focus on your core competency

Jocoda offers the proven answer to all those challenges for vehicle sharing services, rental companies, eco friendly municipalities, early-stage businesses or big corporates, no hidden costs
